قصتي · خطة الريلز

Reels sprint R25–R36

Strategy, production bible, the shared Remotion kit (K0) and 12 reel briefs: second-by-second timelines, Remotion prompts, ElevenLabs scripts and captions.

Written 21 October 2026, after the Instagram audit · @qissati_kids

> **Build status (21 Oct 2026):** the K0 kit and Qissati-R26 are built in `marketing-reel/` and pass lint, build, frame checks and the eye-comfort check. R26 has original music and SFX; its voiceover is pending the house-voice choice, and its subtitles use a planned cadence until the ElevenLabs take is aligned. R25 and R27–R36 are briefs only.

Qissati reels sprint: R25–R36

A four-week sprint of 12 Remotion reels that turns the reach the account already has into orders. Written 2026-10-21, after the Instagram audit.

Files in this folder:

File	What it is
`README.md`	This strategy: why these reels, in what order, and how they're measured
`00-production-bible.md`	The rules every reel follows: motion, eye comfort, kinetic type, morphs, ElevenLabs, captions, plus the shared-kit prompt (K0)
`R25.md` … `R36.md`	One brief per reel: goal, hooks, cover, Remotion prompt, second-by-second timeline, ElevenLabs script, caption pages, Instagram caption

To build a reel, give Claude Code: *"Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` and `R26.md`, then build Qissati-R26."* Build K0 (the shared kit) first; every reel prompt assumes it exists.

---

1. What the audit showed (baseline, Oct 2026)

Measure (30 days)	Value
Reels posted	16 (daily, Oct 3–20)
Instagram viewers	3,409 (the "9,493 views" figure is 4,794 IG + 4,699 Facebook crosspost)
Profile visits	38 (1.1% of viewers)
Website link taps	**1**
Followers	15
Orders	0

What worked:

- **Questions parents can use tonight.** The bedtime question reel (Oct 14) was the only one that worked on every measure: 935 IG views, 9 saves, 7 shares, 5 follows.
- **A tiny choice that's easy to answer.** The 3 doors reel (Oct 11): 1.2K views and the only comments on the account, because answering took one emoji.
- **Local.** Amman through a child's eyes (Oct 13): 931 views.

What didn't:

- **Explaining the product** (form screens, process, safety, Oct 4–7): about 110 views each.
- **Object metaphors** (toy, boot, things, gift): weakest group, and the same paper-diorama look every day had started to read as a template.
- **Asking for written comments about the child**: nobody does it.

- **No reel ever showed the price, the real book, or what happens after ordering**, so viewers had no reason to tap the link.

2. The strategy in one sentence

Keep the formats that earn reach (bedtime questions, tiny choices, local moments), and pair each one with a reel that proves the product: a real answer becoming a real page, the price, and the order path.

Three changes from the October run:

1. **Every reach reel ends with a soft bridge.** The last 2 seconds show a small line, *جوابه ممكن يكون أول صفحة بقصته* or similar, with the Qissati mark. It's a bridge, not a sales pitch. In October the reach reels led nowhere.
2. **Proof reels show the price and one CTA.** Live prices: **PDF from 15 JOD, print from 32 JOD, delivery inside Jordan included.** These go on screen in the proof and gift reels. Turnaround days are still `[X]` in the dashboard, so no reel promises a delivery time.
3. **3 reels a week, not 7.** Fewer reels, more craft, and time to answer DMs. October's daily cadence produced reels that looked alike.

3. The signature device: the Qissati morph

Every reel has **one moment where a child's detail visibly becomes a story element**: an answer card morphs into a page, a pillow into a cloud, a puddle into a sea. That's the product promise shown as motion, so viewers learn it without being told. It also ties 12 different-looking reels together as one brand. The production bible lists the morph types (M1–M5).

4. Four content pillars

Pillar	Job	Reels	CTA
سؤال الليلة (bedtime question series)	Reach, saves, shares, return viewers	R25, R28, R32 (+ R36 payoff)	Save · one-word comment
من الجواب للصفحة (proof)	Conversion: show answer → sentence → page	R26, R29, R33	Link in bio + price
هدية بتحكي عنه (gift)	Fast orders from gift buyers	R27, R35	R27: comment «هدية» (DM path) · R35: link in bio. Testing both paths
كيف بنكتبها (trust)	Remove doubts: process, parent approval, AI honesty	R31, R34	Link in bio
Local / seasonal	Reach in Jordan	R30 (first rain)	One-word comment

The bedtime question becomes a **numbered series** (ep 1 was the Oct 14 reel). A recognisable series frame (same opening title card, same night room) gives people a reason to follow: *there'll be another one*. R36 pays the series off by turning "your child's answer" into "your child's book".

5. Calendar

Sunday / Tuesday / Thursday. Bedtime episodes at **20:30 Amman time** (the moment they're for); the others at **18:00**, near the October winners. After 6 reels, compare the two slots on non-follower reach and saves, then decide.

Week	Sun	Tue	Thu
1 (Oct 25–29)	**R25** سؤال الليلة ٢ · الغيمة	**R26** جواب واحد صار صفحة	**R27** هدية لطفل عنده كل إشي
2 (Nov 1–5)	**R28** سؤال الليلة ٣ · الحيوان	**R29** = ٣ أجوبة بطلة	**R30** أول شتوة بعيون طفل *(hold for the first rain forecast; swap with another slot if needed)*
3 (Nov 8–12)	**R31** شو بيصير بعد الاستمارة؟	**R32** · سؤال الليلة ٤ السفينة	**R33** مش قالب
4 (Nov 15–19)	**R34** هاي ذكاء اصطناعي؟ *(only after the owner approves the wording)*	**R35** عيد ميلاده جاي؟	**R36** جواب طفلكم = أول صفحة

Pin to the profile grid once posted: **R26** (proof), **R31** (process), **R27** (gift). A visitor who lands on the profile should see proof, process and price in the first row, not the latest game.

6. Before the first reel goes out

Reels can't convert into a profile that doesn't answer the next question. None of these is a reel, but each one blocks orders:

- [ ] **Fix the Oct 17 reel**: its caption is a Webra web-design ad. Edit it or archive the reel.
- [ ] **Fill in the display name**: `قصتي | قصص أطفال مخصصة`. It's the field Instagram search reads.
- [ ] **Rewrite the bio** to answer what / where / how much / how: e.g. `قصص مصوّرة مكتوبة حول طفلك 📖 · من الأردن 🇯🇴 · PDF · اطلبوا من هون ↓ من ١٥ دينار · مطبوعة من ٣٢ مع توصيل`
- [ ] **Add 4 highlights**: كيف نطلب · نموذج (Q-000002 pages, labelled نموذج توضيحي) · الأسعار · أسئلة.
- [ ] **Saved replies** for «هاي», «كم السعر؟», «قديش بتاخذ؟AI» (playbook §7), now with the real prices.
- [ ] **UTM links** in the bio link per week (`utm_source=instagram&utm_medium=organic&utm_campaign=sprint-w1`) so link taps can be tied to orders.
- [ ] Watch time and skip rate per reel: check them in the **mobile app** (web insights don't show them).

7. Measurement

Each reel is judged against its own pillar, not against likes.

Pillar	Primary metric	Target per reel (hypothesis)	October baseline
Bedtime / local reach	IG non-follower viewers · saves	≥ 900 viewers · ≥ 10 saves	935 / 9 (best reel)
Proof	Profile visits · link taps	≥ 10 visits · ≥ 3 taps	~2 visits · 0 taps
Gift	DMs with «هدية» (R27) · link taps (R35)	≥ 3 DMs · ≥ 3 taps	0
Trust	Watch time · saves · profile visits	Watch time ≥ 50% of length	not measured

Sprint goal (4 weeks): ≥ 150 profile visits, ≥ 25 link taps, ≥ 3 saved orders. If reach holds but link taps stay near zero, the problem is the profile or the offer, not the reels. Fix §6 before making more videos.

Re-cut rule (from the playbook): a reel that beats the median reach of the last six by 2× gets a second version after 14 days with a new hook and cover, same body.

8. Rules that don't bend (from the playbooks + CLAUDE.md)

- Q-000002 is a **fictional marketing sample**. Every use of its artwork carries **«نموذج توضيحي»** for the whole time it's on screen. Never "قصة حقيقية" ,"عميلة", or a result for a child.
- **No testimonials** until a real customer consents in writing. No fake comments or usernames.
- **No delivery-time promise** until turnaround is set in `/admin`.
- **No "رساميناً" / "رسم يدوي"**. The art is prepared with AI tools and reviewed page by page.
- **No WhatsApp number as an on-screen CTA**. Path: link in bio or DM → form → WhatsApp after the order is saved.
- **Never ask for the child's name, photo or habit in a public comment.** Comment prompts ask for one general word.
- **Avatar-only tier is not sold** (coming soon).
- **Arabic:** no letter-spacing, no per-letter animation, no uppercase; numbers with nouns follow agreement (`١٥ دينار`, not `١٥ دنانير`).
- **Palette:** teal + gold + cream (+ berry accent). Never blue+orange or blue+pink.
- Music and SFX are original (generated), never trending audio.

Production bible: R25–R36

Every reel in this sprint follows this file. The per-reel briefs only state what differs. When a brief and this file disagree, the brief wins for that reel, and the difference should be deliberate.

The five qualities asked for, made measurable:

1. **Cinematic animation**: motivated light, depth, lens behaviour, one colour script per reel.
2. **Fluid camera**: one continuous, eased move per beat; no cuts where a move or morph can carry the change.
3. **Morphing shapes**: one signature morph per reel (a child's detail becoming a story element), plus supporting morphs.
4. **Kinetic type**: Arabic that moves by word and phrase, timed to the voice, never by letter.
5. **Eye comfort**: hard numeric limits on flashes, speed, contrast, reading time and motion density.

---

1. Format and frame

Size / rate	1080×1920, 30 fps, H.264
Length	16–24 s per brief; narration ends **≥ 2 s before the last frame**
Safe rectangle	x 180–900, y 300–1230 (`src/reels-safe-area.js`). All copy, logo and the hero object stay inside it, *including during motion*. Backgrounds bleed full frame.
Feed crop	Essential content also fits the centred 4:5 crop (y 285–1635 → in practice the safe rectangle already does)

Vertical bands inside the safe rectangle (use these so reels look like one family):

Band	y range	Holds
Mark	310–380	Small Qissati mark + series badge (e.g. «سؤال الليلة ٢»)
Headline	400–640	Kinetic headline: max 2 lines, 64–84 px Cairo 800
Stage	640–1060	The 3D/2D scene's focal object
Subtitles	1070–1170	Narration captions: 1 line, 44–50 px Cairo 700, on a cream plate
Bridge / CTA	1170–1228	Final-seconds CTA or bridge line, 40–46 px

Nothing essential below y 1230: that's Instagram's caption, buttons and account name.

2. Cinematic animation

- **Motivated light only.** Every glow has a source in frame: window, moon, lamp, or a story object that's genuinely glowing. No floating blobs (the brand rule from the website hero).
- **Three depth layers** in every shot: foreground (soft, darker, slow), midground (the focal object, sharp), background (soft, lighter, slowest). Parallax ratio roughly 1.6 : 1 : 0.5.
- **Lens:** 35–50 mm equivalent (Three.js FOV 28°–40° for vertical). Wide-angle distortion reads as a game.
- **Depth of field:** use it for focus pulls (C5), not as permanent blur. Focal object always sharp. R15's BokehPass is the reference.
- **Colour script per reel:** pick one of the three looks and keep it for the whole reel unless the brief says otherwise.
  - *Night* (bedtime series): teal `#0f4f51` → `#146466`, moon cream, gold accents ≤ 10% of the frame.

    - *Paper day* (proof, gift, trust): cream `#fdf8f0` ground, teal objects, gold rules, berry `#b84c6e` for one key word at most.
    - *Book* (when Q-000002 artwork is on screen): the artwork sets the palette; surroundings stay neutral cream/teal so the pages lead.
- **Texture:** paper grain ≤ 3% opacity, static (not boiling per frame). Vignette ≤ 12%.
- **Original art only.** Q-000002 pages from `public/samples/q-000002/` (labelled «نموذج توضيحي») and new procedural/vector art. No stock, no photoreal landmarks, no children's faces other than the labelled sample.

3. Fluid camera

Build every camera move through the kit's `CameraRig` (see §9). Rules:

- **Driven only by `useCurrentFrame()`**: deterministic, no `useFrame()` accumulation. Paused and backward Studio seeks must render the right frame (reuse the explicit frame-commit pattern from R18–R24).
- **Keyframes with time-aware Hermite/Catmull-Rom interpolation**, eased in and out. Default ease `bezier(0.33, 0, 0.2, 1)`. Springs only with `damping ≥ 200` (no overshoot on the camera, ever).
- **One move per beat**, then a hold of ≥ 12 frames before the next move starts.
- **Speed caps:** rotation ≤ 25°/s; dolly ≤ 0.6 frame-heights/s; zoom (FOV) change ≤ 8°/s; push-ins 100→108% over ≥ 2.5 s.
- **No shake, no handheld noise, no whip pans, no snap zooms, no Dutch angles.**
- **Prefer continuity over cuts.** Change scenes with a dolly-through (C2) or a match-morph. Hard cuts only where the brief marks `CUT`, maximum 2 per reel, never on a luminance jump.

Camera vocabulary used in the timelines:

Code	Move	Typical length
C1	Slow push-in (or pull-out when marked "rev")	2.5–4 s
C2	Dolly-through: camera passes through a frame, door or page into the next scene	1–1.5 s
C3	Orbit 15–25° around the focal object	2–3 s
C4	Crane: high view descending to child-eye level (or rising when marked "rev")	2–3 s
C5	Rack focus between two depth layers	0.6–1 s
C6	Parallax drift: background ≤ 4 px/s, no visible camera intent	continuous
HOLD	Camera still	≥ 0.4 s

4. Morphing shapes

Each reel names one **signature morph** (the Qissati morph, see README §3) plus supporting morphs.

Code	Morph	How to build
M1	**Card → page**: a rounded answer card's outline becomes a book page frame; its content resolves into the page art	SVG path interpolation, then a mask reveal of the artwork inside the new frame
M2	**Silhouette → silhouette**: one object outline becomes another (pillow→cloud, roof→sail, cake layers→pages)	SVG `interpolatePath` from `@remotion/paths` (add at exactly 4.0.529). Resample both paths to the same point count first; author start/end with matching start points and winding so the morph doesn't twist

Code	Morph	How to build
M3	**Shadow → scene**: an object's cast shadow becomes a story vignette (the R15 technique)	Composited SVG mask on the floor plane, driven by frame
M4	**Light → shape**: a glow, drop or star becomes a path, outline or page edge	Animated stroke (`strokeDashoffset`) + fill fade
M5	**Fold**: a flat surface folds into an object or scene (page→landscape, tiles→doorway)	Three.js hinged planes or CSS 3D; hinge positions follow RTL/LTR rules

Morph timing: 18–30 frames, eased in/out, never linear. The shape must be readable at the start and end (hold ≥ 8 frames each side). No particle explosions, no liquid "goo" transitions, no generic template wipes.

5. Kinetic typography (Arabic)

Hard rules (CLAUDE.md): split by **word or phrase only**, never per letter (per-letter spans break the joins). No `letter-spacing` /tracking, no uppercase. Text lives in a DOM/SVG layer above the canvas with `dir="rtl"`, in **screen space** (it never rides the 3D camera). Numerals in Arabic-Indic (`١٠`). Word separators sit outside each word's inline-block (the `WordReveal` lesson).

Type vocabulary used in the timelines:

Code	Effect	Spec
K1	Word rise-in	Each word: opacity 0→1, y +14→0 px, blur 6→0 px over 10–12 frames; words staggered 3–4 frames in reading order
K2	Mask wipe in reading direction	Phrase revealed by a soft-edged mask moving right→left over 12–16 frames
K3	Emphasis settle	One key word scales 1.00→1.06→1.00 over 14 frames, or turns gold. Max one per line
K4	Phrase swap	Old phrase blurs out (8 f) while the new one blurs in at the same anchor (10 f). No slide
K5	Gold underline draw	4 px gold stroke draws right→left under one phrase, 14 frames
K6	Word on object	A word printed on a 3D tile/card that the camera sees; must still be readable (≥ 56 px apparent size, facing camera within 20°)

Typing animations go **word by word** (a whole word appears per keystroke beat), never character by character.

Reading time: a headline stays fully visible for at least `0.6 s + 0.32 s × words`. A 6-word line holds ≥ 2.5 s. If the timeline can't give it that, shorten the line, not the hold.

No duplicate text: when the narration says exactly what the headline shows, the subtitle band stays empty for that phrase. Two copies of the same words on screen split attention.

6. Eye comfort: the limits

These are pass/fail checks, not preferences.

Area	Limit
Flashes	No more than **3 flashes per second** anywhere (WCAG 2.3.1). A flash = a luminance swing of ≥ 10% of the frame's area up and back. Glints and sparkles: one at a time, ≥ 0.4 s apart

Area	Limit
Brightness changes	Full-frame average luminance may change ≤ 20% in any 10-frame window. Night→day changes take ≥ 3 s
Contrast	Headline and subtitles ≥ 4.5:1 against what's directly behind them (use the cream plate or a scrim; image pixels don't count)
Extremes	No pure `#000` or `#fff`. Darkest `#0b3c3e`, lightest `#fdf8f0`
Patterns	No fine stripes, checkerboards or high-frequency textures larger than 10% of the frame. Rain streaks low contrast (≤ 25% opacity), not strobing
Motion density	Max **2 moving focal elements** at once (camera move counts as one). Background drift ≤ 4 px/s
Camera	§3 speed caps. No motion blur stronger than a 0.3-frame shutter
Text motion	Text never moves while being read. It enters, holds still, leaves
Cuts	Average shot ≥ 2 s; ≤ 2 hard cuts per reel
Audio	Voice −16 LUFS integrated, true peak ≤ −1 dBTP. Music ducked ≈ −18 dB under voice. SFX soft attacks; no sudden loud hits
End	Final CTA holds ≥ 2 s with no new motion except a slow loop-back in the last 0.5 s

7. Voiceover with ElevenLabs

One house voice for the whole sprint. October used four different voices, including a Saudi-accented one over Jordanian scripts. Pick one warm Levantine (ideally Jordanian) voice from the ElevenLabs Voice Library, female or male, and keep it for all 12 reels so the account has a recognisable voice. Record the choice (voice name + ID) in this file once made.

Settings (starting point, then lock them):

Setting	Bedtime series (R25, R28, R32, R36)	All other reels
Model	`eleven_multilingual_v2` (most stable timing). `eleven_v3` only if you want audio tags such as `[softly]`, and test it first	same
Stability	0.55	0.45
Similarity	0.75	0.75
Style	0.15	0.25
Speaker boost	on	on
Speed	0.92	0.97
Output	`pcm_48000` or `mp3_44100_192`	same

Preparing the text:

- Paste the brief's **ElevenLabs script** exactly. Each brief also gives a pronunciation line: add tashkeel only on the words listed there (e.g. `قصّتي`, `بـوذيـك`). Full tashkeel makes the voice sound like MSA.
- `...` produces a short pause; a new sentence a longer one. Don't use SSML breaks unless a brief asks.
- If a word comes out wrong, fix the spelling in the input, regenerate the whole take, and never splice words from different takes.

Getting word timings (preferred route):

1. Generate through the **Text-to-Speech *with timestamps*** endpoint (`POST /v1/text-to-speech/{voice_id}/with-timestamps`). It returns the audio plus character-level start/end times.
2. Convert characters → words by splitting on spaces, giving each word the first character's start and the last character's end.
3. Run the existing prepare step (normalise to 48 kHz mono WAV, −16 LUFS, no time-stretch beyond 25%), and map timings through any speed change.
4. **Review against the waveform** and fix phrase edges by hand, then write `captions.json` (format below) and `voice-timing.json` with the source and final SHA-256 hashes, as R17–R19 do.

Fallback: ElevenLabs' forced-alignment endpoint or the local Whisper scripts (`transcribe:rNN`) on the final WAV, then reconcile spellings to the script. Check the current ElevenLabs API docs for endpoint names before scripting. Store the API key in `marketing-reel/.env` (git-ignored); never in a committed file.

Never present the brief's planned cadence (the "VO" column in the timeline) as measured subtitles. It's a plan; the WAV decides.

8. Captions

Two different things share the word "caption":

1. **On-screen subtitles** (in the video), generated from `captions.json`:

```
[
 { "text": "سؤال", "startMs": 120, "endMs": 480, "timestampMs": 300, "confidence": null },
 { "text": "الليلة:", "startMs": 480, "endMs": 980, "timestampMs": 730, "confidence": null, "pageBreakAfter": true
}
]
```

- Each brief lists the **caption pages** (phrase groups). Put `pageBreakAfter: true` on the last word of each page.
- One line per page, ≤ 6 words, in the subtitle band (y 1070–1170) on a cream plate (`#fdf8f0` at 92%) with teal text.
- Upcoming words at 88% opacity (keeps ≥ 4.5:1 on the plate; 45% measured 2:1 and 82% measured 4.4:1); the spoken word at 100% with a 3 px gold underline. No colour flashing, no per-word pop scale.
- Gold used for TEXT is `#9e6a0c` (kit `C.goldDeep`), not the brand `#f4b740`, which is decoration-only on cream.
- A page stays ≥ 0.8 s; page ends are capped at the next page's start.
- The no-duplicate rule (§5) applies: skip a page whose words are the current headline.
- Voice and captions share one `<Sequence>` and frame zero.

2. **The Instagram post caption**: given at the end of each brief, ready to paste. 3–5 hashtags maximum.

9. K0: the shared kit (build this first)

Copy-ready prompt:

> In `marketing-reel/`, create a shared kit at `src/kit/` for the R25–R36 sprint, following `briefs/2026-11-reels-sprint/00-production-bible.md`. Keep every existing composition untouched. Remotion 4.0.529; add any package (`@remotion/paths`, `@remotion/shapes`, `@remotion/noise`) at exactly 4.0.529. Components, all deterministic from `useCurrentFrame()`:

1. `CameraRig` : takes keyframes `{frame, position, target, fov}` and returns the Three.js camera state through time-aware Hermite interpolation with the bible's default ease; enforces the speed caps in dev with a console warning.
2. `KineticHeadline` : RTL Arabic headline split by word (never letters), implementing K1–K5 with props for timing; words keep separators outside each inline-block; reading-time check in dev.
3. `SubtitleBand` : renders `captions.json` pages per §8 (cream plate, gold underline on the active word, upcoming words dimmed), with a `hideWhen` prop for the no-duplicate rule.
4. `MorphPath` : wraps `interpolatePath` with automatic resampling to equal point counts and an eased progress prop; supports fill, stroke and use as a mask.
5. `SeriesBadge` (e.g. «Γ سؤال الليلة»), `BridgeLine` and `CtaLine` in the bible's bands, plus `SampleLabel` («نموذج توضيحي», always visible while Q-000002 art is on screen).
6. `FrameCommit` : the explicit-render pattern from R18–R24 so paused/backward Studio seeks paint the right WebGL frame.
7. `comfort-check.mjs` script: renders every 5th frame of a composition to small PNGs, computes average luminance and flags any 10-frame window with > 20% change or > 3 flashes per second; also prints the headline contrast at given frames.

Add the kit's JSX paths to `eslint.config.mjs` . Show a `Kit-Demo` composition exercising each component. Run the package's build and lint.

10. Shared preamble for every reel prompt

Every reel prompt in the briefs starts with this. It's repeated there so each prompt is self-contained:

Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()` . Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check` , and run both the reel project's and the main site's build and lint.

11. Render and delivery

- Delivery renders: `--codec=h264 --crf=18 --pixel-format=yuv420p --color-space=bt709 --image-format=png` , then confirm with `ffprobe` that matrix/transfer/primaries read `bt709` and range is `tv` (CLAUDE.md "MP4 delivery colour settings").
- Keep a clean master with no platform watermark for both Instagram and Facebook.
- Before publishing, watch it once **muted** on a phone: every beat must be understandable without sound.

R25 · سؤال الليلة ٢: الغيمة

Pillar	سؤال الليلة (bedtime series, episode 2)
Goal	Reach + saves + shares; return viewers for the series
Length	18 s · 540 frames
Look	Night (same room family as the Oct 14 episode, so the series is recognisable)
Post	Week 1, Sunday, 20:30 Amman
CTA	Save the question · bridge line to Qissati
Signature morph	**M2 pillow → cloud** (a thing from the child's room becomes the story's first object)

First frame (hook A): «سؤال الليلة ٢» + «لو لقيت غيمة صغيرة بغرفتك... شو بتعمل فيها؟» **Hook B to test later:** «جرّبوا هالسؤال قبل ما تطفّوا الضو» **Cover:** the cloud above the bed, moon in the window, the full question.

Remotion prompt

Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.

Create **Qissati-R25** (18 s, 540 frames) and **Qissati-R25-Cover**, using `briefs/2026-11-reels-sprint/R25.md` for the exact timeline, copy, VO and caption pages. Scene: a quiet, generic night bedroom in deep teal paper-craft (no child, no likeness): a bed on the left, a moonlit window on the right, soft cream moonlight on the wall. The series badge «سؤال الليلة ٢» sits in the mark band for the whole reel. The pillow catches the moonlight, then its outline morphs (M2, 24 frames) into a small cream cloud that lifts and bobs slowly. The cloud drifts past the window and releases five gold drops, one every 0.4 s (no flicker, no sparkle bursts). The drops land and spread into a gold paper path (M4), the camera dollies gently along it to a door ajar, and the warm light from the door resolves into the outline of an open book (M4). A bookmark settles onto the book for the save CTA, then the cloud morphs back into the pillow so the last frame matches the first for a clean loop. Camera: Three.js, 40° FOV, three depth layers, slow push-ins and one dolly; all moves eased and within the bible's speed caps. Music: a slow, warm, original lullaby bed (celesta + soft pad), ducked under the voice; SFX: room tone, one low chime on the badge, a soft whoosh on the morph, five quiet pizzicato drops, paper rustle, a muted bookmark click. Final 3 s: question holds, bridge line appears, no new motion except the loop-back.

Done when

- Key frames for checks: 0, 105 (morph mid), 240 (path), 375 (book), 539.
- The full question is readable for ≥ 4 s; the drops never flash; the last frame matches the first.

R26 · جواب واحد... صار صفحة

Pillar	من الجواب للصفحة (proof)
Goal	Conversion: show, in one continuous move, an answer on the order form becoming a line of story and an illustrated page
Length	20 s · 600 frames
Look	Paper day → Book
Post	Week 1, Tuesday, 18:00 · **pin to profile**
CTA	Link in bio, with the price
Signature morph	**M1 answer card → page** (the product promise, literally)

First frame (hook A): «نموذج توضيحي» + «جواب واحد بالاستمارة... صار صفحة» **Hook B:** «هاي مش قصة جاهزة منبدّل فيها الاسم» **Cover:** half card, half page: the typed answer on the right, the page-07 art on the left, joined by a gold line.

Source material is the fictional marketing order Q-000002, so «نموذج توضيحي» stays visible from frame 0 to the last frame. The form label is the real one from `lib/dictionaries/ar.js` (`quirk.label`). The story line is the real page-7 text from the same file.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R26** (20 s, 600 frames) and **Qissati-R26-Cover** from `briefs/2026-11-reels-sprint/R26.md`. Scene: a cream paper desk with soft window light from the right. A 3D answer card (cream, rounded, thin teal border, tilted 8° toward camera) floats in the stage band. Its label reads exactly «شو عادة أو حركة مميزة بيعملها طفلكم؟». A caret blinks, then the answer types in **word by word** (never by letter): «بتلبس جرابين بلونين مختلفين، وبتعطي كل لون اسم». A gold underline draws under «جرابين بلونين». The card then turns to face the camera and its outline morphs (M1, 26 frames) into a square page frame; inside it, `public/samples/q-000002/page-07.jpg` is revealed by a soft mask moving right→left. The camera pushes in slowly toward the yellow sock and the kitten's paw (keep both fully in frame). The real page-7 sentence appears on a cream plate under the art (vocalised exactly as below). The typed answer shrinks to a chip above the page and a gold line draws from the chip to the sock, so the cause is visible. The page then turns (M5) to the cover (`cover.jpg`, shown whole and square on teal), and the price and CTA appear in the bottom bands. `SampleLabel` («نموذج توضيحي») is visible on every frame. Music: light, warm, curious original theme (marimba + soft strings), ducked under voice. SFX: soft keyboard tick per word, a paper whoosh on the morph, a page turn, nothing harsh.

Instagram caption

جواب واحد بالاستمارة... صار صفحة كاملة 📖

بنموذج Q-000002 التوضيحي، كتبنا إنها «بتلبس جرابين بلونين، وبتعطي كل لون اسم» — وبالقصة صار الجراب الأصفر «شمس» هو اللي طمّن قطة صغيرة خايفة.

هيك منكتب كل قصة: من تفصيلة حقيقية عند طفلكم، مش من قالب منبدّل فيه الاسم.

هدية لطفل عنده كل إشي · R27

Pillar	هدية بتحكي عنه (gift)
Goal	Orders from gift buyers (aunts, uncles, grandparents, friends)
Length	18 s · 540 frames
Look	Paper day (tabletop diorama) → Book
Post	Week 1, Thursday, 18:00 · **pin to profile**
CTA	Comment «هدية» → DM path (R35 tests the link path)
Signature morph	**M2 gift ribbon → book bow** (the usual gifts fold away; the ribbon becomes the book's)

First frame (hook A): «شو بتجيبوا لطفل عنده كل إشي؟» **Hook B:** «بدل لعبة ثانية… هدية بتحكي عنه» **Cover:** a wrapped book with a teal ribbon on cream, the question above.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R27** (18 s, 540 frames) and **Qissati-R27-Cover** from `briefs/2026-11-reels-sprint/R27.md`. Scene: a cream paper tabletop seen at a gentle 30° overhead angle, window light from the right. Three paper-craft gift silhouettes stand in a row: a toy, a folded sweater, a chocolate box (generic, no logos). As the VO names each one, it folds flat into a teal ribbon strip (M5) and slides out of frame, one at a time, never two moving at once. The last ribbon curls back in and morphs (M2) into the bow of a wrapped book in the empty spot. The wrapping opens like petals, the book opens (hinge on the right for an Arabic book), and three spreads from `public/samples/q-000002/` (page-01, page-05, page-07, shown whole) appear in turn while K1 labels land beside them: «باسمه» → «بشخصيته» → «وبتفصيلة ما حدا بيعرفها غيركم». The camera pulls back to show the book whole on the table for the price and the comment CTA. `SampleLabel` is on from the moment the book opens. Music: a bright but gentle original theme (glockenspiel + plucked strings); SFX: three soft paper folds, a ribbon swish, a page turn, a light chime on the price. No sparkle bursts.

R28 · سؤال الليلة ٣: حيوان واحد

Pillar	سؤال الليلة (episode 3)
Goal	Reach + comments (a one-word answer, the format that got the only comments in October)
Length	18 s · 540 frames
Look	Night: the same room, a bedside lamp throwing shadow-puppets on the wall
Post	Week 2, Sunday, 20:30
CTA	Comment the animal's name (one word)
Signature morph	**M3 + M2 lamp shadow → animal → animal → open book**

First frame (hook A): «سؤال الليلة ٣» + «لو قدرت تحكي مع حيوان واحد… مين بتختار؟» **Hook B:** «سؤال بيكشف شو بيحب طفلكم بجد» **Cover:** the lamp, a cat-shaped shadow on the wall, the question.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R28** (18 s, 540 frames) and **Qissati-R28-Cover** from `briefs/2026-11-reels-sprint/R28.md`. Scene: the series' night bedroom, closer framing on one wall. A small paper bedside lamp casts a warm cone; on the wall, a soft-edged cream-on-teal shadow-puppet theatre. The shadow morphs (M2 on an SVG shadow layer composited onto the wall plane, 18 frames per morph, ≥ 27-frame holds) through four original silhouettes: a cat, a small bird, a camel (a gentle local touch), a turtle. Then it becomes a question mark and finally the silhouette of an open book (the bridge). Only the shadow and one slow camera push move at any moment. The lamp light breathes very slightly (±3% brightness over 4 s, never flickering). The series badge «سؤال الليلة ٣» holds in the mark band. Music: hushed original music-box bed; SFX: a soft "tok" per morph (no animal sounds), page rustle at the book. End on the comment prompt held for 3 s.

Second by second

سؤال الليلة ٣ 🌙
«لو قدرت تحكي مع حيوان واحد... مين بتختار؟ وشو أول سؤال رح تسأله؟»
اسألوا طفلكم قبل النوم، واسألوه ليش اختاره.
اكتبولنا اسم الحيوان بس 👇 (بلا أسماء أو تفاصيل عن الطفل)
#قصتي #سؤال_الليلة #قصص_أطفال

Done when

- Key frames: 0, 105 (cat), 225 (camel), 345 (question mark), 405 (book), 539.
- Every silhouette is readable for ≥ 0.9 s; the lamp never flickers.
- Answer every comment with a short, warm one-liner within working hours. Comments are the point of this reel.

R29 · ٣ أجوبة... وصارت بطلة

Pillar	من الجواب للصفحة (proof)
Goal	Conversion: three short answers visibly assemble into a character and a whole book
Length	20 s · 600 frames
Look	Paper day → Book
Post	Week 2, Tuesday, 18:00
CTA	Link in bio, with the price
Signature morph	**M2 answer cards → story shapes, then M1 shapes → cover frame**

First frame (hook A): «٣ أجوبة... وصارت بطلة قصة» + «نموذج توضيحي» **Hook B:** «شو منسألكم عن طفلكم؟ ٣ أشياء بس» **Cover:** three cards fanned in front of the Q-000002 cover.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R29** (20 s, 600 frames) and **Qissati-R29-Cover** from `briefs/2026-11-reels-sprint/R29.md`. Scene: cream paper desk, window light from the right. Three 3D answer cards enter one at a time, each carrying a small label and an answer as K6 text: «صفتين: فضولية وحنونة», «شو بتحب: القطط والألوان», «عادة مميزة: جرايين إلهم أسماء». As each answer is spoken, its card's outline morphs (M2, 22 frames) into a gold line-art story shape: a small heart, a cat, a pair of socks. The three shapes then travel, one at a time, into a square frame at centre; the frame's outline morphs (M1) into the book cover and `public/samples/q-000002/cover.jpg` is revealed by a right→left mask. The camera dollies through the cover (C2) into a spread showing `page-05.jpg`, then eases to `page-09.jpg`, both shown whole. Close on the cover with the price and CTA. `SampleLabel` is visible on every frame. Music: curious, building original theme (pizzicato + warm pad); SFX: a soft card-land tap per card, a light chime per morph, a page turn.

- Never more than one card or shape moving at a time; every card's text readable ≥ 1.5 s.

أول شتوة بعمّان… بعيون طفل · R30

Pillar	Local / seasonal
Goal	Reach in Jordan + one-word comments, riding a moment every Jordanian family shares
Length	20 s · 600 frames
Look	Paper day, rainy: cooler teal-grey paper with warm window lights. **Teal and cream, not blue**: rain must not drift into the blue palette the brand avoids
Post	Week 2, Thursday, but **hold it for the first rain forecast in Amman** and post that day (18:00). Have it rendered in advance
CTA	Comment one word: what the child does first when it rains
Signature morph	**M2 rain boot → paper boat**, with M3 puddle → sea and M5 stairs → river

First frame (hook A): «أول شتوة بعمّان… بعيون طفل» **Hook B:** «الكبار بيشوفوا مطر… الطفل بيشوف بحر» **Cover:** rainy paper hillside, a small boot on the stairs, the line above.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R30** (20 s, 600 frames) and **Qissati-R30-Cover** from `briefs/2026-11-reels-sprint/R30.md`. Scene: an original stylised Amman hillside in paper-craft (you may reuse and re-light the warm-stone blocks and stairs from `src/r16/`; no photoreal landmarks, no maps, no people). Re-light it for the first rain of winter: cooler teal-grey paper, low-contrast rain streaks (≤ 25% opacity, slow, never strobing), wet highlights in cream, warm gold window lights. The camera starts high (C4) and cranes down to child-eye level on a stair landing. A puddle on the landing morphs (M3) into a small paper sea with gentle waves; the stairs fold into a flowing paper river of layered ribbons (M5) that runs downhill; a small berry-red rain boot standing on a step morphs (M2) into a paper boat that sails down the stair-river. The camera follows the boat in one slow dolly, then rises a little to frame the question. No child appears; the boot is the child's presence. Music: cosy original theme (felt piano + soft rain-stick texture), ducked under voice. SFX: gentle rain bed, a single drip on the morph, water lap, a soft paper fold.

Second by second

R31 · شو بيصير بعد ما تعبّوا الاستمارة؟

Pillar	كيف بنكتبها (trust / process)
Goal	Remove the "what happens after I order?" doubt; show the parent approves the text before any illustration
Length	22 s · 660 frames
Look	Paper day: kinetic typography + one continuous morph chain
Post	Week 3, Sunday, 18:00 · **pin to profile**
CTA	Link in bio
Signature morph	**M1 chain: form → story text → approval → pages → book / phone** (one object changing shape four times, never cut)

First frame (hook A): «شو بيصير بعد ما تعبّوا الاستمارة؟» **Hook B:** «من أول جواب لباب البيت: ٤ خطوات» **Cover:** the big numerals ٤ ٣ ٢ ١ in a row, each with a tiny icon (form, text, check, book).

Claim check: every step here is true in the current product. The parent approval step is the dashboard's "parent text approval" gate (CLAUDE.md, "Parent text approval is a real production gate before artwork"). Don't add a delivery time.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R31** (22 s, 660 frames) and **Qissati-R31-Cover** from `briefs/2026-11-reels-sprint/R31.md`. This is a refined kinetic-typography piece on cream paper with one hero object that **changes shape four times without a cut**. A large gold numeral (٢ → ١ ٤ → ٣ →) sits at the start (right) side of the headline band and swaps with K4 at each step. Step 1: the object is a form card with three short field lines (no real data, generic labels only). Step 2: it morphs (M1) into a portrait page of story text, drawn as soft teal text-lines with one readable line «كان يا ما كان…». Step 3: a parent-approval panel slides up from the page's bottom edge and a gold check mark draws (K5-style stroke) beside «موافقة الأهل على النص». Step 4: the page splits into a fan of three illustrated pages using `public/samples/q-000002/page-02.jpg`, `page-06.jpg`, `page-09.jpg` (with `SampleLabel`), each getting a small gold review tick in turn, then the fan closes into a book that shows a phone (PDF) and a printed book side by side. The camera is a slow continuous C1 drift (≤ 4% scale change per step) plus one C3 orbit at step 4. Music: steady, light, confident original groove (soft mallets + brushed percussion); SFX: a paper tick at each step change, a pen-stroke on the check, a soft page fan.

- The hero object never cuts: frame-step through 90–540 and confirm one continuous shape.

R32 · سؤال الليلة ٤: البيت صار سفينة

Pillar	سؤال الليلة (episode 4)
Goal	Reach + comments + shares (a family game: everyone gets a role)
Length	18 s · 540 frames
Look	Night: outside the house this time, a paper house on a teal paper sea under the moon
Post	Week 3, Tuesday, 20:30
CTA	Comment: who's the captain at your house (one word)
Signature morph	**M2 house → ship** (roof → sail, base → hull): home becomes the adventure

First frame (hook A): «لو بيتكم صار سفينة الليلة... مين القبطان؟» + «سؤال الليلة ٤» **Hook B:** «لعبة نوم للعيلة كلها» **Cover:** the house-ship mid-morph under the moon, the question.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R32** (18 s, 540 frames) and **Qissati-R32-Cover** from `briefs/2026-11-reels-sprint/R32.md`. Scene: a night exterior in layered paper-craft: an original small stone house with warm windows, sitting on rolling teal paper waves (three depth layers, slow independent drift), a cream moon, sparse paper stars. As the question is asked, the roof's outline morphs (M2, 26 frames) into a cream sail and the house's base morphs into a hull; the house-ship begins to sail slowly right→left (reading direction). Three small paper lanterns on the deck light one at a time (each fades up over 10 frames; no flicker), each with a flag carrying a role word (K6): «القبطان», «الطباخ», «حارس النجوم». The camera does one slow C3 orbit around the ship, then holds for the question. No people: the roles are empty flags waiting for names. The series badge «سؤال الليلة ٤» holds in the mark band. Music: gentle original sea-shanty lullaby (accordion-like pad, very soft); SFX: soft wave wash, a creak on the morph, a warm "glow" tone per lantern.

- Lanterns light sequentially, never together; no flicker on any frame.

R33 · مش قالب منبدّل فيه الاسم

Pillar	من الجواب للصفحة (proof / objection)
Goal	Conversion: make the difference from "name-swap" books visible in one glance, without naming or mocking any competitor
Length	20 s · 600 frames
Look	Paper day → Book
Post	Week 3, Thursday, 18:00
CTA	Link in bio, with the price
Signature morph	**M5 template page folds away, revealing the detail-built page**

First frame (hook A): «الفرق بين قصة باسم طفلك… وقصة مكتوبة حوله» **Hook B:** «لأ؟ كل القصص المخصصة نفس الشي.» **Cover:** two pages side by side; on the template one the name slot is mid-swap, on the other three gold callouts.

The template page is an **original, deliberately plain mock-up**: no publisher, logo, character or layout borrowed from any real product (playbook R3 rule). It must look neutral, not ugly.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R33** (20 s, 600 frames) and **Qissati-R33-Cover** from `briefs/2026-11-reels-sprint/R33.md`. Scene: a cream desk with two square pages lying on it in 3D, seen from a gentle 35° overhead angle. Page 1 (start side, right) is a neutral, original template: a simple flat landscape and one line of text «وراح [الاسم] على الغابة» where only the name changes, crossfading slowly every 0.9 s (10-frame crossfade, never a flicker): «ليان» → «عمر» → «سارة». Everything else on page 1 stays identical, which is the point. The camera then dollies sideways (C2, eased, 1.2 s) to page 2: `public/samples/q-000002/page-07.jpg` shown whole, with `SampleLabel`. Three gold callout outlines draw on it one at a time (M4 + K5 labels): the yellow sock «شمس" جرابها"», the white cat «قطتها لوز», the garden «حديقة بيتها بعمّان». Page 1 then folds in half and slides out of frame (M5), and page 2 rises to fill the stage. Close on `cover.jpg` (whole, square, on teal) with the price and CTA. Music: thoughtful original theme that brightens at the reveal (piano → piano + strings); SFX: a soft paper tick per name swap, a pen stroke per callout, a paper fold.

>
> Create **Qissati-R34** (24 s, 720 frames) and **Qissati-R34-Cover** from `briefs/2026-11-reels-sprint/R34.md`. A calm, typography-led editorial piece on cream. It opens on a large gold «؟» in the stage band under the question headline; on «آه» the «؟» morphs (M2, 24 frames) into a gold check mark. A sample page (`public/samples/q-000002/page-05.jpg`, with `SampleLabel`) then slides into the stage and **separates into two 3D planes** with a slow C3 orbit: the illustration plane (labelled «الرسم: بأدوات ذكاء اصطناعي») and, floating in front of it, a story-text plane of soft text lines (labelled «القصة: من إجاباتكم»). A small editing caret appears on one text line, one word is replaced (word swap K4), and a gold review tick lands beside the page; the same happens on two more sample pages (`page-07.jpg`, `page-09.jpg`) that slide in as a short stack, one tick each, never two moving at once. The planes then rejoin into one page and the camera pulls back to the closing line and CTA. Music: minimal, warm original piano, very low; SFX: a soft tone on the morph, a pen tick per review mark. No glitch, no robots.

R35 · عيد ميلاده جاي؟

Pillar	هدية بتحكي عنه (gift / occasion)
Goal	Orders tied to a birthday; tests the **link path** against R27's comment path
Length	18 s · 540 frames
Look	Paper day: a paper-craft birthday cake on a cream table, warm candle light
Post	Week 4, Tuesday, 18:00
CTA	Link in bio
Signature morph	**M2 cake layers → stacked pages → book**, with M4 candle flames → stars that light the title

First frame (hook A): «عيد ميلاده جاي؟» **Hook B:** «هدية ما بتخلص بنفس اليوم» **Cover:** the cake mid-morph, its top layer already a page, candles glowing.

Turnaround is still undecided in `/admin`, so this reel promises **no number of days**. The honest line is: order early and we'll tell you straight whether we can make the date.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R35** (18 s, 540 frames) and **Qissati-R35-Cover** from `briefs/2026-11-reels-sprint/R35.md`. Scene: a cream table in soft afternoon light; an original three-layer paper-craft birthday cake (cream, teal and gold paper, berry for the candles) with five small candles whose flames sway gently (no flicker; ±4% brightness, slow). On the VO's turn («بس كتاب...»), the candle flames lift off one at a time as small gold stars (M4) and drift up; then the cake's three layers morph (M2, 26 frames) into a neat stack of pages that closes into a book (M5, hinge on the right). The stars land on the cover and form a soft glow around the title area. The book opens to `public/samples/q-000002/page-10.jpg` (whole, with `SampleLabel`), then closes for the price and CTA. Camera: one slow C1 push on the cake, one C3 orbit (15°) during the morph, then hold. Music: warm, gently celebratory original theme (no "Happy Birthday" melody: it's a copyrighted risk and a cliché); SFX: a soft "puff" per flame-star, a paper fold, a page turn.

عيد ميلاده جاي؟ 🎂
الكيك بيخلص بنفس اليوم... بس كتاب هو بطله، باسمه وبتفاصيله، بيضل يرجعله كل ليلة.
اطلبوه بدري، وإذا عندكم تاريخ محدد احكولنا، ومنقلكم بصراحة إذا منلحق قبل المناسبة.
مطبوعة من ٣٢ دينار مع توصيل مجاني داخل الأردن · PDF من ١٥. الرابط بالبايو 🔗

Done when

- Key frames: 0, 195 (flames → stars), 240 (cake → pages), 315 (page-10), 465 (price), 539.
- No "Happy Birthday" melody anywhere in the score; no delivery-time number on screen or in the VO.

R36 · جواب طفلكم... ممكن يصير أول صفحة

Pillar	سؤال الليلة: series payoff (bridge from reach to conversion)
Goal	Turn the series' audience into orders: "the answer your child gave can start their book"
Length	20 s · 600 frames
Look	Night → dawn: the series' teal night slowly warms to cream (luminance ramp ≥ 3 s), then Book
Post	Week 4, Thursday, 20:30
CTA	Link in bio, with the price
Signature morph	**M1 four episode objects → four pages → one book**

First frame (hook A): «٤ أسئلة نوم... وجواب طفلكم ممكن يصير كتاب» **Hook B:** «جاوب على سؤال الليلة؟ هاد أول سطر بقصتو» **Cover:** four small night dioramas in an arc (door, cloud, animal shadow, ship) around a glowing book.

The four objects are the four episodes: the secret door (Oct 14 reel), the cloud (R25), the animal shadow (R28), the house-ship (R32). If one of those wasn't posted, drop it and adjust the VO list.

Remotion prompt

> Read `marketing-reel/briefs/2026-11-reels-sprint/00-production-bible.md` first and follow it. Build in `marketing-reel/` with Remotion 4.0.529 and the `src/kit/` components; keep all earlier compositions untouched. 1080×1920, 30 fps. Drive every camera, geometry, light, morph and type animation from `useCurrentFrame()`. Arabic stays in an RTL DOM/SVG layer, split by word only, in screen space, inside x 180–900 / y 300–1230. Teal/cream/gold palette (berry for one accent at most). Meet the bible's eye-comfort limits. Separate voice, music and SFX tracks; generate original music and SFX with a `score:rNN` script; voice is disabled until the final ElevenLabs WAV is aligned. Register a separate cover Still. Provide `checks:rNN` (first/middle/last frames + the brief's key frames), run `comfort-check`, and run both the reel project's and the main site's build and lint.
>
> Create **Qissati-R36** (20 s, 600 frames) and **Qissati-R36-Cover** from `briefs/2026-11-reels-sprint/R36.md`. Scene: on the series' deep-teal night ground, four small paper dioramas sit on an arc in the stage band, each a miniature of one episode: a secret door with moonlight, a cream cloud, a lamp with an animal shadow, the house-ship on paper waves (reuse geometry from R25/R28/R32 if those exist; otherwise build simple originals). The camera makes one slow C3 orbit (25° over 4 s) as the VO names them, lighting each in turn (fade up over 10 frames, no flicker). Then each diorama's frame morphs (M1, 22 frames, one at a time, 0.5 s apart) into a page thumbnail; the four pages fly into a stack that closes into a book (M5, hinge right). As the book forms, the background warms from night teal to dawn cream over 3.5 s (luminance change within the bible's limits). The book reveals `public/samples/q-000002/cover.jpg` (whole, with `SampleLabel`) as the example of a finished book. Close with the price and CTA. Music: the series' lullaby motif, gently brightening into a fuller warm arrangement at dawn; SFX: a soft chime per diorama, a paper flutter as pages stack, a page close.

ElevenLabs script (paste exactly)

صار عنا أربع أسئلة للنوم: الباب السري، الغيمة، الحيوان، والسفينة. إذا طفلكم جاوب على وحدة منهم... هاد الجواب ممكن يكون بداية قصته الخاصة، مكتوبة حوله هو، ومرسومة على مقاسه. واطلبوا قصته من الرابط بالبايو.

- 34 words · target ≈ 15 s · must end by 18 s.
- Direction: the series' bedtime voice, starting hushed, gaining warmth from «إذا طفلكم جاوب». Same voice and settings as R25/R28/R32.
- Pronunciation: `مقاسه`.
